Create reports on Action Network

Creating reports in Action Network let you see what rebels have told us about themselves and create lists that match certain criteria. To learn more, check out the guidance document here

Note that, once you have created a report you will see a link in red, bottom right; CREATE AN EMAIL BASED ON THIS REPORT. If you are targeting mail, this might be a better way to go about it than using targeting after you have written the mail because you will be able to see a list of avtivists targeted before you go any further.
