

Email Campaigns

An email campaign is an excellent addition to any messaging campaign for your area!

Note this is pretty advanced email use and not something that many (any?) local groups have tried.

It allows you to send timed emails over a period, target your emails to specific parts of your mailing list, delay follow-up emails and send emails in response to actions your rebels may have taken. It's easy, a great role for remote rebels.

Check out the [How to Guide](#) for creating email campaigns on Action Network.

And don't forget to ask rebels to take time off for the Rebellion!
