

Friends of the Earth - Action Network training resources

Friends of the Earth (FoE) have produced a good number of training videos and other training documentation to help FoE groups get to grips with this software application.

These FoE training materials cover a wider range of functions Action Network can do than the emailing functionality currently in general use by XR groups. This includes creating petitions, letter campaigns, events and forms.

An overview of the FoE Action Network training materials is on their Action Network group page here: <https://actionnetwork.org/groups/friendsoftheearth>.
