Design toolkit for COP26

Design toolkit version 8 is out with the updated messaging for COP. Trying to bring together both the key message of us challenging our leaders to make COP26 possible and the interconnectedness of the impacts of our decisions on the planet.

It has a new impossible font, a new colour palette, swirly textures and introduces Camille the COP26 chameleon.

A PDF copy (3Mb) has been posted to the Mattermost channel "UK Creative Circle - Arts Reception" in the UK Team, or ask for more information using the contact details in the header to that channel.
