

# Email Campaigns

An email campaign is an excellent addition to any messaging campaign for your area!

It allows you to send timed emails over a period, target your emails to specific parts of your mailing list, delay follow-up emails and send emails in response to actions your rebels may have taken. It's easy, a great role for remote rebels.

Check out the [How to Guide](#) for creating email campaigns on Action Network.

**And don't forget to ask rebels to take time off for the Rebellion!**
